PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 8+ years of experience building web applications, SaaS platforms, ecommerce products, APIs, administrative systems, and responsive user interfaces. Experienced across React, Next.js, Angular, TypeScript, Node.js, PHP, Laravel, and CodeIgniter, with hands-on work in multi-tenant platforms, payment integrations, third-party services, AI-assisted features, and vector-based ecommerce search. Comfortable contributing across frontend and backend development, integrating external services, modernizing legacy applications, and delivering product features from implementation through testing.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, AngularJS, JavaScript, TypeScript, HTML5, CSS3, SCSS, LESS, Tailwind CSS, Bootstrap, jQuery, Inertia.js, shadcn/ui

Backend & APIs: Node.js, PHP, Laravel, CodeIgniter, REST APIs, AJAX, JSON, XML, SOAP, third-party API integration

Databases & Data: MySQL, PostgreSQL, Supabase, ClickHouse, MongoDB, Firebase, Prisma

AI & Search: OpenAI, Gemini AI, text embeddings, vector search, AI-assisted content generation

Integrations: Shopify, WordPress, Razorpay, Stripe, Tap Payment Gateway, Zapier, Facebook Graph API, WhatsApp notifications, Instagram-related workflows

Tools & Platforms: Git, GitHub, SVN, NPM, VS Code, WebStorm, Xcode, Capacitor, Cordova, Linux, macOS, Windows

Engineering: Responsive UI, multi-tenancy, ecommerce, SaaS, role-based admin panels, payment/billing workflows, application modernization

PROFESSIONAL EXPERIENCE

MeghRaj TechnoSoft — Senior Full-Stack Developer | Jan 2018–Present

- Develop and maintain web applications across frontend and backend layers using modern JavaScript frameworks and PHP-based platforms.
- Build responsive interfaces, reusable components, administrative panels, role-based workflows, and API-connected product features.
- Integrate third-party services for payments, ecommerce platforms, notifications, AI-assisted functionality, and external data workflows.
- Work with relational and NoSQL data stores, application APIs, source control, and Linux-based development/deployment environments.
- Contribute to existing applications through feature development, bug fixing, responsive improvements, framework upgrades, and legacy plugin migration.
- Collaborate with team members and stakeholders to translate product requirements into maintainable implementations.

SELECTED PROJECT EXPERIENCE

NexoralQ — AI-Powered Ecommerce Search SaaS

Jun 2026–Present | React, Next.js, Tailwind CSS, shadcn/ui, Node.js, TypeScript, Prisma, PostgreSQL, Supabase, ClickHouse, OpenAI

- Contribute to an AI-powered ecommerce search SaaS platform, including tenant administration and platform settings.
- Develop Shopify and WordPress connector integrations to connect ecommerce stores with the platform.
- Work on billing and plan settings, Razorpay payment workflows, MFA/2FA, and active-session security features.
- Contribute to AI-powered search functionality using embeddings and vector search.

Lamma — AI-Powered Online Store Builder

Laravel, Inertia.js, React, Next.js, Laravel Modules, multi-tenancy, Gemini AI, Tap Payment Gateway

- Helped build the ecommerce platform from scratch, including multi-tenant store functionality and administration/customer interfaces.
- Implemented product, order, stock, shipping, storefront customization, banner, and homepage-section management features.
- Integrated Gemini AI for product descriptions from product images/titles and shop descriptions from shop images/titles.
- Worked on subscription/payment flows with Tap, multilingual and multicurrency storefront support, Instagram-related onboarding workflows, and WhatsApp order notifications.

Dresoul / InCityStyle — Ecommerce Platform

Laravel, PHP, MySQL, payment and third-party API integrations

- Served as the main developer with support from one team member on a fashion/ethnic ecommerce platform.
- Worked on guest shopping, account signup flow, favorites, coupons, shipping, order placement integrations, BillDesk payments, and mobile OTP authentication.

RX5 Devices — Healthcare Dashboard

React, Server-Sent Events (SSE), responsive dashboard UI

- Developed frontend functionality for a healthcare/room-management dashboard, including room details, camera activity, calling, and patient movement notifications.
- Implemented responsive and resizable dashboard layouts, settings/detail popups, and snooze functionality.

The LYT Control — Smart Lighting App

Angular, Capacitor, Bluetooth Low Energy (BLE)

- Worked on modernizing the application from an older Angular version and replacing deprecated Cordova plugins with Capacitor-compatible alternatives.
- Supported Bluetooth device controls for brightness, saturation, color, and presets.

Butterfly — Social Community Platform

React, Laravel, MySQL, Node.js streaming

- Worked in a two-person team on user follows, posts with images/audio/video, comments, likes, and sharing workflows.
- Implemented a QR-code workflow to support moving content from mobile to desktop posting.

Buckman — Process Visualization

React, GoJS

- Developed frontend features for process visualization, including process views, context menus, context-point dropdowns, labels, and stream labels.
- Worked on visual refinements such as optimization and transparency adjustments.

RexConnect — Real Estate Platform

Laravel, MySQL, JavaScript, AJAX, REST APIs

- Built and maintained property rental/sale listings, agent and agency features, role-based panels, listing/detail pages, filters, and AJAX pagination.
- Contributed APIs and a mobile-oriented version of the property browsing experience.

ADDITIONAL PROJECTS

Genesis Connector / Dashboard: React, Kendo UI — room management, device scanning, listings, and responsive/resizable layouts.

Apply Insure / Boom Insure: Angular, Node.js, Zapier, Google Sheets — multi-step insurance estimate forms and email workflows.

MY CPE: Laravel, MySQL — webinar booking, timezone-aware scheduling, dynamic listings/details, CRUD workflows, and image cropping.

DiningHour: CodeIgniter, MySQL, HMVC, Cordova APIs — restaurant booking, restaurant details, and separate super-admin/admin/vendor panels.

eBelong: Laravel, MySQL — Admin/Agency/Agent role-based panels, theme integration, and AJAX pagination.

RexCRM: Angular — calendar integration and task scheduling.

Journal Manuscript Submission & Peer Review: Angular — testing, bug fixing, and support for an existing manuscript workflow.

Kahaniya: Angular — informational and About Us pages.

VoIP Essential: Laravel, MySQL — API development based on client specifications.

EDUCATION

- Bachelor of Computer Applications (BCA) — MKSU, Bhavnagar | 2015–2017
- HSC — GSEB | 2014 | 65%
- SSC — GSEB | 2012 | 59%

Languages: Gujarati, Hindi, English
